DETAILED ACTION

Claim Rejections - 35 USC § 103

1. Claims 1-5, 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA in view of Lange et al as discussed in paragraph of the previous office action.
2. Applicant's arguments filed 12/202004 have been fully considered but they are not persuasive. In response to applicants argument regarding secondary reference Lange et al, the examiner first notes that AAPA discloses that it is known to have multiple pressure contacting means that are adjustable as claimed. The secondary reference, Lange et al, is being used to teach the concept of using a spindle that is used for adjusting changes in axial positions of gears rotating. The secondary reference is being used to teach the adjustable spindle means which is being used to combine AAPA to adjust the positions of the multiple pressure contacting means to eliminate the use of multiple motors. Regarding the newly added limitation of handling variable width webs, the examiner notes that expressions relating the apparatus to contents thereof during an intended operation are of no significance in determining patentability of the apparatus claim. See ex parte Thibault, 164 USPQ 666, 667 (Bd App. 1969). Furthermore, inclusion of material or article worked upon by a structure being claimed does not impart patentability to the claims. In re Young, 75 F.2d 996, 25 USPQ 69 (CCPA 1935) (as restated in In re Otto, 312 F.2d 937, 136 USPQ 458, 459 (CCPA 1963). Furthermore, AAPA teaches multiple pressure contacting members to handle workpieces.

The examiner also notes that the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

4. Claims ⁷~~6~~-10 are allowed.
